

# COMPONENT MODEL APPROACH IN MODELING SITE BUILT PRODUCTS

---

D. Charlie Ćurĉija

*Center for Energy Efficiency and Renewable Energy (CEERE)*

Building Energy Efficiency Program

University of Massachusetts at Amherst, MA

# PRESENTATION OUTLINE

---

- Introduction
- Component performance
- The whole product
- Size specific numbers
- Conclusions

# INTRODUCTION

- Problem with whole product rating
- Who is responsible party
- In terms of energy performance, size specific information may be more important than pre-set size (i.e., 80 in. x 80 in.)

# COMPONENT PERFORMANCE

---

- Get certified rating for frame lineals
- and glazing (including spacer) and
